Software Products

OceanStor DeviceManager (Device Management)	eSight (Storage Resource Management Part)	OceanStor ReplicationDirector (Disaster Recovery)	OceanStor CSE (Data Service)
• Single equipment management • Support Web mode • Support multi application platform	• Storage management • Path analysis ability • Performance and capacity reporting	• Multi site disaster recovery management • Multi site practice, switching • Support the physical machines and virtual machine	• Support files to S3 mapping • Object storage capacity based on the multi tenant • Support for cross data center connectivity

Hardware Products

Entry Level Storage	Medium and low-end Unified Storage	Enterprise Storage		Solid State Storage	Big Data Storage	
OceanStor S2200T	OceanStor S2600T/S5500T/S5600T/S5800T	OceanStor S6800T	OceanStor 18000 Series	OceanStor Dorado2100 G2/5100	OceanStor N8500	OceanStor 9000
• Dual controllers • 4GB cache • 204 disks	• Unified storage, supports both block and file applications • Up to 192GB cache • Up to 1,440 disks	• Up to 384GB cache • Up to 1,440 disks • 250,000 IOPS	• 2 ~ 16 controllers • Up to 3TB cache • Up to 3,216 disks • 0~5s RPO	• 400,000/600,000 IOPS • 500μs access latency	• Active-Active cluster architecture • 2~24 nodes • Max.15PB capacity • 3M OPS	• Distributed architecture • 3~288 nodes • Single file system 40 PB • 5M OPS
