

CloudEngine 8800 Series Data Center Switches

CloudEngine 8800 Series Data Center Switches

Product Overview

Huawei CloudEngine 8800 series (CE8800) switches are 100G Ethernet switches designed for data centers and high-end campus networks. The switches provide high-performance, high-density 100GE/40GE/25GE/10GE ports, and low latency. Using the Huawei VRP8 software platform, CE8800 switches provide extensive data center service features and high stacking capability. In addition, the airflow direction (front-to-back or back-to-front) can be changed. CE8800 switches can work with CE12800/CE8800/CE6800/CE5800 switches to build an elastic, virtualized, high-quality fabric that meets the requirements of cloud-computing data centers.

CE8800 switches can function as core or aggregation switches on data center networks to help enterprises and carriers build a scalable data center network platform in the cloud computing era. They can also be used as aggregation or core switches for enterprise campus networks.

Product Appearance

The CE8800 series is available in the following models:

CE8860-4C-EI

2 U high, supporting four flexible cards of half the standard width

CE8850-32CQ-EI

32*100GE QSFP28 ports
2*10GE SFP+ ports

CE8850-64CQ-EI

64*100GE QSFP28 ports

CE8861-4C-EI

2 U high, supporting four flexible cards of half the standard width

CE8800 supports the following models of cards:

CE88-D24S2CQ

24*10GE/25GE(SFP28) and 2*100GE (QSFP28) card

CE88-D24T2CQ

24*10GE (BASE-T) and 2*100GE (QSFP28) card

CE88-D8CQ

8*100GE (QSFP28) card

CE88-D16Q

16*40GE (QSFP+) card

CE88-D24S2CQ-U

24-Port 25GE/16GE FC (SFP28) and 2*100G (QSFP28) card

Product Characteristics

25GE Access Switch with Flexible Cards

- CE8860/CE8861 supports 25GE (SFP28)/10GE (SFP+) auto-sensing interfaces and is applicable to scenarios of high-density 25GE/10GE server access.
- CE8860/CE8861 supports a maximum of 32*100GE, 64*40GE, or 128*25GE/10GE ports, delivering high-density access and aggregation capabilities through flexible card combinations.
- CE8850 supports a maximum of 64*100GE, 64*40GE, 128*25GE, or 128*10GE ports, delivering high-density access and aggregation capabilities.

High-Density 100GE/40GE Aggregation and Outstanding Switching Capacity

- The CE8850-64CQ-EI provides 12.8 Tbit/s switching capacity, forwarding performance of 4,400 Mpps, and supports L2/L3 line-speed forwarding.
- The CE8850-64CQ-EI provides a maximum of 64*100GE QSFP28 or 64*40GE QSFP+ ports, and can function as the core or aggregation switch on a data center or campus network.
- The 100GE QSFP28 port supports 100GE optical modules. One 100GE port can be used as four 25GE SFP28 ports. The 100GE QSFP28 port also supports 40GE QSFP+ optical modules. 40GE ports can be converted to 10GE ports through QSFP+ breakout cable.
- The CE8860/CE8861 supports 100GE/40GE/25GE/10GE flexible cards, delivering flexible networking capability. It can work with CE12800/CE7800/CE6800/CE5800 series data center switches to build a non-blocking network platform.

Highly Reliable, High-Performance Stacking

- Support 16-member stack system
 - » A stack system of 16 member switches (CE8850-64CQ-EI/ CE8850-32CQ-EI) that provide high-density server access in a data center.
 - » Multiple switches in a stack system are virtualized into one logical device, making it possible to build a scalable, easy-to-manage data center network platform.
 - » A stack system separates the control plane from the data plane. This eliminates the risk of single points of failure and greatly improves system reliability.
- Long-distance stacking
 - » The CE8800 can use service ports as stack ports. A stack system can be established with switches in the same rack or different racks, and even over long distances.
 - » Service and stack bandwidths can be allocated based on the network's scale so that network resources can be used more efficiently.

Network-Wide Reliability, Ensuring Zero Service Interruptions

- The CE8800 supports multichassis link aggregation group (M-LAG), which enables links of multiple switches to aggregate into one to implement device-level link backup.
- Switches in an M-LAG system can be upgraded independently. During the upgrade, other switches in the system take over traffic forwarding to ensure uninterrupted services.
- With the industry's most comprehensive inter-device link aggregation technology, the device networking coupling relationship evolves from stacking at the control plane to the use of M-LAG and then finally to coupling-free M-LAG Lite. This achieves active-active server access and high reliability during switch upgrade.

Large-Scale Routing Bridge, On-Demand Scalability

- The CE8800 supports the IETF Transparent Interconnection of Lots of Links (TRILL) protocol. A TRILL network can contain more than 500 nodes, enabling flexible service deployments and large-scale Virtual Machine (VM) migrations.
- The TRILL protocol uses a routing mechanism similar to IS-IS and sets a limited time to live (TTL) value in packets to prevent Layer 2 loops. This significantly improves network stability and speeds up network convergence.
- On a TRILL network, all data flows are forwarded quickly using Shortest Path First (SPF) and Equal-Cost Multi-Path (ECMP) routing. SPF and ECMP avoid the suboptimal path selection problem in STP and increase link bandwidth efficiency to 100 percent.
- The CE8800 supports TRILL-based Layer 2 equal-cost paths, greatly improving links' load balancing capabilities. The network has a fat-tree architecture that enhances expansion.

Converged Enhanced Ethernet, Data, Storage, and Computing Traffic over One Network

- The CE8800 supports Fibre Channel over Ethernet (FCoE), which permits storage, data, and computing services to be transmitted on one network, reducing the costs of network construction and maintenance.
- The CE8800 supports centralized FCoE/FC gateway deployment, which makes network O&M simpler.
- Various CE8800 features ensure lossless transmission: Priority-based Flow Control (PFC), Enhanced Transmission Selection (ETS) and Data Center Bridging eXchange (DCBX). These features ensure low latency and zero packet loss for FC storage and high-speed computing services.

Programmable Network Device, Flexible Customization

- The CE8800 uses the Open Programmability System (OPS) embedded in the VRP8 software platform to provide programmability at the control plane.
- The OPS provides open APIs. APIs can be integrated with mainstream cloud platforms (including commercial and open cloud platforms) and third-party controllers. The OPS enables services to be flexibly customized and provides automatic management.
- Users or third-party developers can use open APIs to develop and deploy specialized network management policies to implement extension of fast service functions, automatic deployment, and intelligent management. The OPS also implements automatic operation and maintenance, and reduces management costs.
- The OPS provides seamless integration of data center service and network in addition to a service-oriented, software-defined networking (SDN).

Virtualized Gateway Achieves Fast Service Deployment

- The CE8800 can work with a mainstream virtualization platform. As the high-performance, hardware gateway of an overlay network (VXLAN), the CE8800 can support more than 16 million tenants.
- The CE8800 can connect to a cloud platform through an open API to provide unified management of software and hardware networks.
- This function implements fast service deployment without changing the customer network. It also protects customer investments.

Zero Touch Provisioning, Automatic O&M

- The CE8800 supports Zero Touch Provisioning (ZTP). ZTP enables the CE8800 to automatically obtain and load version files from a USB flash drive or file server, freeing network engineers from onsite configuration or deployment. ZTP reduces labor costs and improves device deployment efficiency.
- ZTP provides built-in scripts for users through open APIs. Data center personnel can use the programming language they are familiar with, such as Python, to provide unified configuration of network devices.
- ZTP decouples configuration time of new devices from device quantity and area distribution, which improves service provisioning efficiency.

Intelligent O&M with the FabricInsight Solution

- The CE8800 provides proactive path detection on the entire network. It periodically checks sample flows to determine connectivity of all paths on the network and locates failure points, enabling you to know the network health in real time.
- The CE8800 supports visualization of all flows and congestion, improving service experience.
- The CE8800 supports global, precise time synchronization based on IEEE 1588v2, detecting delay with sub-microsecond accuracy.

AI Fabric, Improving Reliability of High-Performance Computing

- In a distributed system, RoCE technology becomes the mainstream. To ensure the throughput and meet strict requirements on packet loss, Huawei ultra-fast Ethernet provides forwarding capabilities with high throughput, high reliability, and low latency for the distributed system, which is 25% lower than the average latency in the industry.
- The CE8881 supports Virtual Input Queue (VIQ) technology. It uses Huawei customized algorithm to customize virtual queues based on services, implementing refined management. It pre-determines uplink and downlink queue congestion to eliminate packet loss.
- The CE8861 uses fast CNP and dynamic ECN to pre-determine network congestion and provide fast feedback, reducing retransmission and throughput decrease caused by packet loss on a network. This keeps a low queue delay while ensuring the throughput.

- The CE8861 provides dynamic load balancing (DLB) based on the ECMP group or LAG.

Flexible Airflow Design Saves Energy

- Flexible front-to-back/back-to-front airflow design
 - » The CE8800 uses a front-to-back/back-to-front airflow design that isolates cold air channels from hot air channels. This design meets heat dissipation requirements in data center equipment rooms.
 - » Air can flow from front to back, or back to front when different fans and power modules are used.
 - » Redundant power modules and fans can be configured to ensure uninterrupted service transmission.
- Innovative energy-saving technologies
 - » The CE8800 has energy-saving chips and can measure system power consumption in real time. Fan speed can be adjusted dynamically based on system consumption. These energy-saving technologies reduce O&M costs and contribute to a greener data center.

Clear Indicators, Simple Maintenance

- Clear indicators
 - » Port indicators clearly show port status and port speeds. The port indicators can show the state of all the 10GE ports derived from the 40GE ports.
 - » State and stack indicators on both the front and rear panels enable operators to maintain the switch from either side.
 - » The CE8800 supports remote positioning. Operators can turn on remote positioning indicators on the switches they want to maintain, so that they can find switches easily in an equipment room full of devices.
- Simple maintenance
 - » The management port, fans, and power modules are on the front panel, which facilitates device maintenance.
 - » Data ports are located at the rear, facing servers. This simplifies cabling.

Product Specifications¹

Functions and Features

Item	CE8860-4C-EI	CE8850-32CQ-EI	CE8850-64CQ-EI	CE8861-4C-EI
Device virtualization	iStack ²			
	M-LAG			
Data center interconnect	VXLAN mapping, implementing interconnection between multiple DCI networks at Layer 2			
Network virtualization	VXLAN routing and bridging			
	BGP-EVPN			
	TRILL(CE8860-4C-EI/CE8850-32CQ-EI/CE8850-64CQ-EI)			
	QinQ access VXLAN			
SDN	Agile Controller			
	VMware NSX(Supported only by the CE8861)

Item	CE8860-4C-EI	CE8850-32CQ-EI	CE8850-64CQ-EI	CE8861-4C-EI
Network convergence	FCoE			
	DCBX, PFC, ETS			
Programmability	OPS			
	Ansible-based automatic configuration and open-source module release			
Traffic analysis	NetStream			
	sFlow			
VLAN	Adding access, trunk, and hybrid interfaces to VLANs			
	Default VLAN			
	QinQ			
	MUX VLAN			
	GVRP			
	Dynamic learning and aging of MAC addresses			
	Static, dynamic, and blackhole MAC address entries			
	Packet filtering based on source MAC addresses			
IP routing	MAC address limiting based on ports and VLANs			
	IPv4 routing protocols, such as RIP, OSPF, BGP, and IS-IS			
IPv6	IPv6 routing protocols, such as RIPng, OSPFv3, IS-ISv6, and BGP4+			
	IPv6 VXLAN over IPv4			
	IPv6 Neighbor Discovery (ND)			
	Path MTU Discovery (PMTU)			
Multicast	TCP6, ping IPv6, tracer IPv6, socket IPv6, UDP6, and Raw IP6			
	IGMP, PIM-SM, PIM-DM, MSDP, and MBGP			
	IGMP snooping			
	IGMP proxy			
	Fast leaving of multicast member interfaces			
	Multicast traffic suppression			
	Multicast VLAN			
MPLS	Multicast VXLAN			
	MPLS			

Item	CE8860-4C-EI	CE8850-32CQ-EI	CE8850-64CQ-EI	CE8861-4C-EI
Reliability	Fine-grained microsegmentation isolation(Supported only by the CE8861-4C-EI)			
	LACP			
	STP, RSTP, VBST, and MSTP			
	BPDU protection, root protection, and loop protection			
	Smart Link and multi-instance			
	DLDP			
	ERPS (G.8032)			
	Hardware-based Bidirectional Forwarding Detection (BFD)(Supported by the CE8850-64CQ-EI and CE8861)			
	VRRP, VRRP load balancing, and BFD for VRRP			
	BFD for BGP/IS-IS/OSPF/Static route			
BFD for VXLAN				
QoS	Traffic classification based on Layer 2 headers, Layer 3 protocols, Layer 4 protocols, and 802.1p priority			
	Actions of ACL, CAR, re-marking, and scheduling			
	Queue scheduling algorithms, including PQ, WRR, DRR, PQ+WRR, and PQ+DRR			
	Congestion avoidance mechanisms, including WRED and tail drop			
	Traffic shaping			
O&M	Network-wide path detection			
	1588v2(CE8850-64CQ-EI)			
	Telemetry			
	INT(IOAM) and ERSPAN+(Supported only by the CE8861-4C-EI)			
	Statistics on the buffer microburst status			
	VXLAN OAM: VXLAN ping, VXLAN tracet			
AI Fabric	N/A	VIQ		
		Dynamic ECN		
		Fast CNP		
		Dynamic load balancing (DLB)		

Item	CE8860-4C-EI	CE8850-32CQ-EI	CE8850-64CQ-EI	CE8861-4C-EI
Configuration and maintenance	Console, Telnet, and SSH terminals			
	Network management protocols, such as SNMPv1/v2c/v3			
	File upload and download through FTP and TFTP			
	BootROM upgrade and remote upgrade			
	802.3az Energy Efficient Ethernet (EEE)			
	Hot patches			
	User operation logs			
	Zero Touch Provisioning (ZTP)			
Security and management	802.1x authentication			
	Command line authority control based on user levels, preventing unauthorized users from using commands			
	DoS, ARP, and ICMP attack defenses			
	Port isolation, port security, and sticky MAC			
	Binding of the IP address, MAC address, interface and VLAN			
	Authentication methods, including AAA, RADIUS, and HWTACACS			
	Remote Network Monitoring (RMON)			

Performance and Scalability

QSFP-40G-LR4-Lite	QSFP-40G-LR4-Lite,40GBase-LR4 Lite Optical Transceiver,QSFP+,40G,Single-mode Module(1310nm,2km,LC)
QSFP-40G-ER4	40GBase-ER4 Optical Transceiver, QSFP+, 40G, Single-mode Module (1310nm, 40km, LC)
QSFP-40G-SDLC-PAM	40GBase-SDLC Optical Transceiver, QSFP+, 40G, Multi-mode (850nm, PAM4, 0.1km, LC)
QSFP-40G-eSDLC-PAM	40GBase-eSDLC Optical Transceiver, QSFP+, 40G, Multi-mode (850nm, PAM4, 0.3km, LC)
100GE-QSFP28 Optical Transceivers	
QSFP-100G-SWDM4	100GBase-SWDM4 Optical Transceiver,QSFP+,100GE,Multi-mode Module(850,0.0.075km-OM3,0.1km-OM4,LC)
QSFP28-100G-SR4	100GBase-SR4 Optical Transceiver, QSFP28, 100G, Multi-mode (850nm, 0.1km, MPO)
QSFP28-100G-LR4	100GBase-LR4 Optical Transceiver, QSFP28, 100G, Single-mode module (1310nm, 10km, LC)
QSFP28-100G-PSM4	100GBase-PSM4 Optical Transceiver, QSFP28, 100G, Single-mode module (1310nm, 0.5km, MPO)
QSFP-100G-CWDM4	100GBase-CWDM4 Optical Transceiver, QSFP28, 100G, Single-mode module (1310nm, 2km, LC)
QSFP-100G-eCWDM4	100GBase-eCWDM4 Optical Transceiver,QSFP28,100G,Single-mode module (1310nm,10km,LC)
QSFP-100G-ER4-Lite	100GBase-ER4-Lite Optical Transceiver,QSFP28,100G,Single-mode module (1310nm,30km(FEC OFF),40km(FEC ON),LC)
QSFP-100G-SR4-NT	100GBase-SR4 Optical Transceiver,QSFP28,100G,Multi-mode (850nm,0.1km,MPO,NT) ,20-60C
QSFP-100G-CWDM4-NT	100GBase-CWDM4 Optical Transceiver,QSFP28,100G,Single-mode module (1310nm,2km,LC,NT) ,20-65C
FC Optical Transceiver	
SFP-FC8G-SW	Optical Transceiver,SFP+,8G/4G/2G,FC Multi-mode Module(850nm,0.15/0.38/0.5km,LC)
SFP-FC8G-LW	Optical Transceiver,SFP+,8G/4G/2G,FC Single-mode Module(1310nm,10km,LC)
SFP-FC16G-SW	Optical Transceiver,SFP+,16G/8G/4G,FC Multi-mode module (850nm,0.1km,LC)
AOC High-Speed Cables	

Part	Product
SFP-10G-AOC-5M	Active Optical Cable , SFP+, 10G, (850nm, 5m, AOC)
SFP-10G-AOC-7M	Active Optical Cable , SFP+, 10G, (850nm, 7m, AOC)
SFP-10G-AOC10M	AOC Optical Transceiver, SFP+, 850nm, 1G~10G, 10m
SFP-10G-AOC-3M	Optical transceiver, SFP+, 1G~10.5G, (850nm, 3m, AOC)
SFP-25G-AOC-3M	Active Optical Cable , SFP28, 25G, (850nm, 3m, AOC)
SFP-25G-AOC-5M	Active Optical Cable , SFP28, 25G, (850nm, 5m, AOC)
SFP-25G-AOC-7M	Active Optical Cable , SFP28, 25G, (850nm, 7m, AOC)
SFP-25G-AOC-10M	Active Optical Cable , SFP28, 25G, (850nm, 10m, AOC)
SFP-25G-AOC-5M-O	Active Optical Cable ,SFP28,25G,(850nm,5m,AOC,Orange)
SFP-25G-AOC-7M-O	Active Optical Cable ,SFP28,25G,(850nm,7m,AOC,Orange)
SFP-25G-AOC-10M-O	Active Optical Cable ,SFP28,25G,(850nm,10m,AOC,Orange)
SFP-25G-AOC-20M-O	Active Optical Cable ,SFP28,25G,(850nm,20m,AOC,Orange)
SFP-25G-AOC-5M-A	Active Optical Cable ,SFP28,25G,(850nm,5m,AOC,Aqua)
SFP-25G-AOC-7M-A	Active Optical Cable ,SFP28,25G,(850nm,7m,AOC,Aqua)
SFP-25G-AOC-10M-A	Active Optical Cable ,SFP28,25G,(850nm,10m,AOC,Aqua)
SFP-25G-AOC-20M-A	Active Optical Cable ,SFP28,25G,(850nm,20m,AOC,Aqua)
QSFP-H40G-AOC10M	Optical transceiver, QSFP+, 40G, (850nm, 10m, AOC)
QSFP-4SFP10-AOC10M	Optical transceiver, QSFP+, 40G, (850nm, 10m, AOC)(Connect to four SFP+ Optical Transceiver)
QSFP-100G-AOC-10M	Active Optical Cable ,QSFP28,100G,(850nm,10m,AOC)
QSFP-100G-AOC-30M	Active Optical Cable ,QSFP28,100G,(850nm,30m,AOC)
Copper Cable	
SFP-10G-CU1M	SFP+, 10G, High Speed Direct-attach Cables, 1m, SFP+20M, CC2P0.254B(S), SFP+20M, Used indoor
SFP-10G-CU3M	SFP+, 10G, High Speed Direct-attach Cables, 3m, SFP+20M, CC2P0.254B(S), SFP+20M, Used indoor
SFP-10G-CU5M	SFP, 10G, High Speed Cable, 5m, SFP+20M, CC2P0.254B(S), SFP+20M, LSRZH For Indoor
SFP-10G-AC7M	SFP, 10G, Active High Speed Cable, 7m, SFP+20M, CC2P0.254B(S), SFP+20M, LSRZH For Indoor

Part	Product
SFP-10G-AC10M	SFP+, 10G, Active High Speed Cables, 10m, SFP+20M, CC2P0.32B(S), SFP+20M,Used indoor
SFP-25G-CU1M	SFP28, 25G, High Speed Direct-attach Cables, 1m, (SFP28), CC8P0.254B(S), SFP28
SFP-25G-CU3M	SFP28, 25G, High Speed Direct-attach Cables, 3m, (SFP28), CC8P0.254B(S), SFP28
SFP-25G-CU3M-N	SFP28, 25G, High Speed Direct-attach Cables, 3m, (SFP28), CC2P0.4B(S), SFP28
SFP28-25G-CU5M	SFP28, 25G, High Speed Direct-attach Cables, 5m, (SFP28), CC2P0.4B(S), SFP28
QSFP-40G-CU1M	QSFP+, 40G, High Speed Direct-attach Cables, 1m, QSFP+38M, CC8P0.254B(S), QSFP+38M, Used indoor
QSFP-40G-CU3M	QSFP+, 40G, High Speed Direct-attach Cables, 3m, QSFP+38M, CC8P0.32B(S), QSFP+38M, Used indoor
QSFP-40G-CU5M	QSFP+, 40G, High Speed Direct-attach Cables, 5m, QSFP+38M, CC8P0.40B(S), QSFP+38M, Used indoor
QSFP-4SFP10G-CU1M	QSFP+, 4SFP+10G, High Speed Direct-attach Cables, 1m, QSFP+38M, CC8P0.254B(S), 4*SFP+20M, Used indoor
QSFP-4SFP10G-CU3M	QSFP+, 4SFP+10G, High Speed Direct-attach Cables, 3m, QSFP+38M, CC8P0.32B(S), 4*SFP+20M, Used indoor
QSFP-4SFP10G-CU5M	QSFP+, 4SFP+10G, High Speed Direct-attach Cables, 5m, QSFP+38M, CC8P0.4B(S), 4*SFP+20M, Used indoor
QSFP28-100G-CU1M	QSFP28, 100G, High Speed Direct-attach Cables, 1m, (QSFP28), CC8P0.254B(S), QSFP28, Used indoor
QSFP28-100G-CU3M	QSFP28, 100G, High Speed Direct-attach Cables, 3m, (QSFP28), CC8P0.254B(S), QSFP28, Used indoor
QSFP28-100G-CU5M	QSFP28, 100G, High Speed Direct-attach Cables, 5m, (QSFP28), CC8P0.4B(S), QSFP28, Used indoor
QSFP-4SFP25G-CU1M	100GE QSFP28-4SFP25G, High Speed Direct-attach Cables, 1m, (QSFP28), (4*(CC2P0.254B(S))), (4SFP28)
QSFP-4SFP25G-CU3M	100GE QSFP28-4SFP25G, High Speed Direct-attach Cables, 3m, (QSFP28), (4*(CC2P0.254B(S))), (4SFP28)
QSFP-4SFP25G-CU3M-N	100GE QSFP28-4SFP25G, High Speed Direct-attach Cables, 3m, (QSFP28), (4*(CC2P0.4B(S))), 4SFP28
QSFP-4SFP25G-CU5M	100GE QSFP28-4SFP25G, High Speed Direct-attach Cables, 5m, (QSFP28), (4*(CC2P0.4B(S))), 4SFP28

Networking and Applications

Data Center Applications

On a typical data center network, CE12800/CE8800/CE7800 switches work as core switches, whereas CE6800 and CE5800 switches work as ToR switches and connect to the core switches using 100GE/40GE/10GE ports. These switches use fabric technology such as TRILL or VXLAN to establish a non-blocking large Layer 2 network, which allows large-scale VM migrations and flexible service deployments.

Note: TRILL and VXLAN can be also used on campus networks to support flexible service deployments in different service areas.

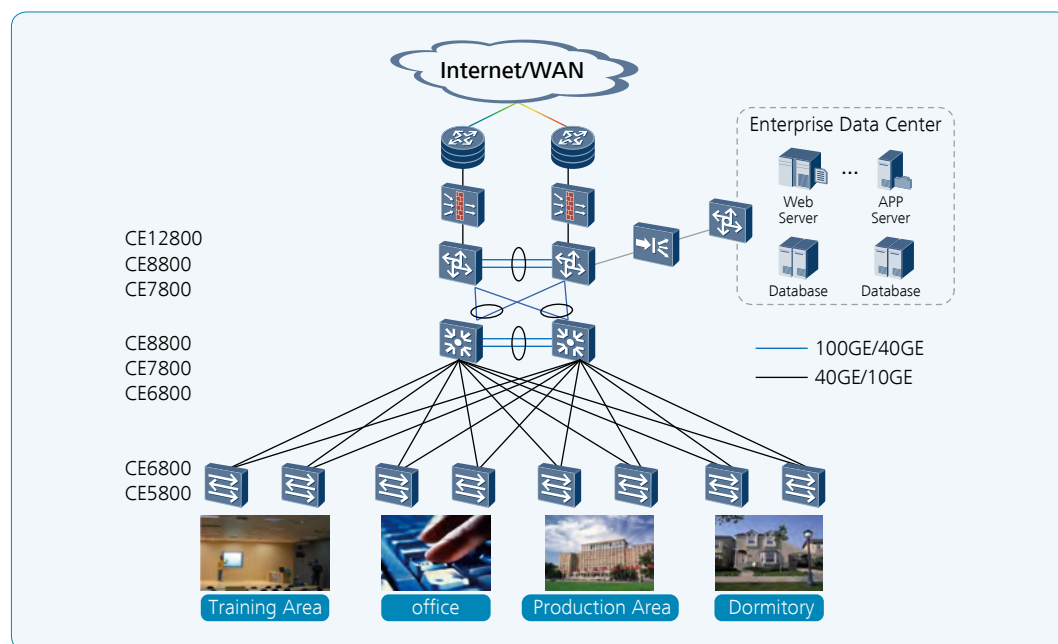

Campus Network Applications

The CE8800 can be used on a campus network. Its high-density, line-speed 100GE/40GE ports and high stacking capability can meet the ever-increasing demand for network bandwidth. CE8800 switches are cost-effective campus network switches, thanks to their extensive service features and innovative energy-saving technologies.

On a typical campus network, two CE12800/CE8800/CE7800 switches are virtualized into a logical core switch using CSS or iStack technology. Multiple CE6800 switches at the aggregation layer form a logical switch using iStack technology. CSS and iStack improve network reliability and simplify network management.

Note: iStack technology is also widely used in data centers to facilitate network management.
