

# Huawei Video Conferencing Network Deployment Solution V20.1

# Distributed Deployment Solution for Medium- and Large-sized Enterprises

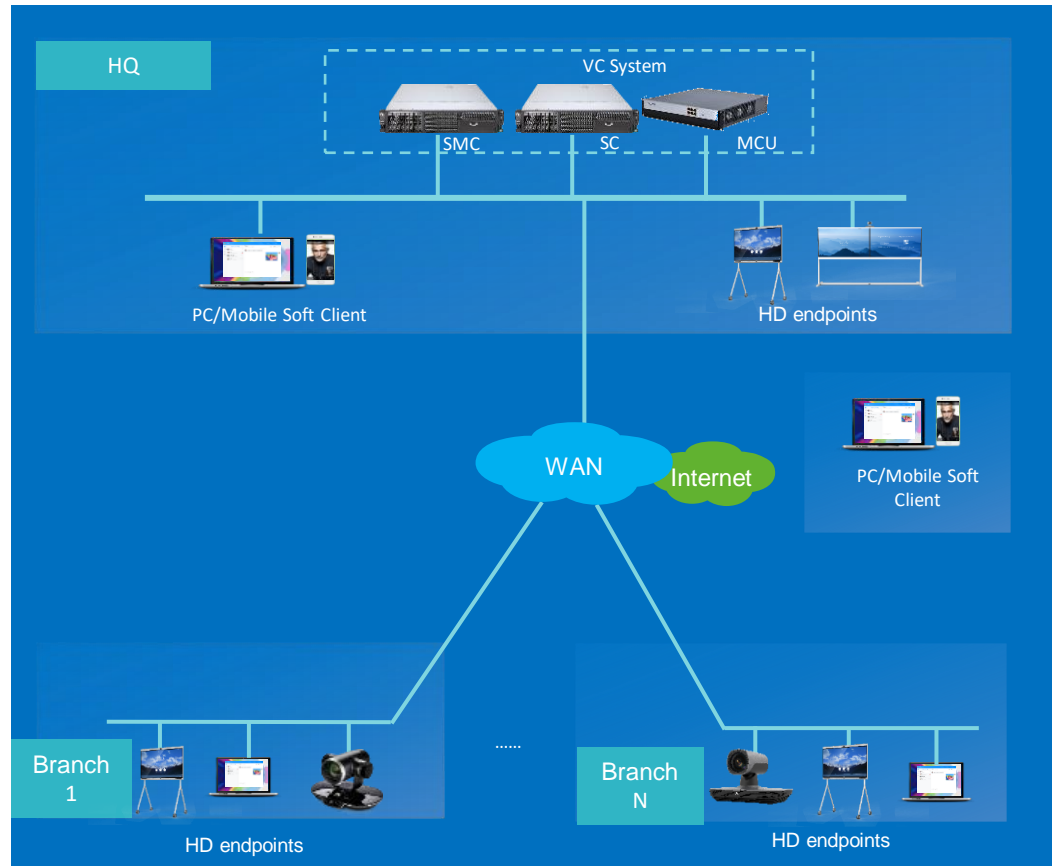

## Solution:

- The VC (Video Conferencing) system is deployed in the HQ data center to process all services.
- Media resources are deployed in regional centers, and data media resources are shared between the HQ and regions and among regions.

## Highlights :

- Nearby access of media resources, saving bandwidth resources and improving audio and video quality as well as user experience
- High reliability: media resource sharing ensure conference and call continuity

# Centralized Deployment Solution for Small- and Medium-sized Enterprises

## Solution:

- The EC system is deployed in the HQ data center to process all services.

## Highlights :

- Single-node aggregation networking, easy to deploy and maintain
