

SSC2801-TM-2 Datasheet 01

Building an Efficient Fiber Infrastructure.

Overview

The SSC2801-TM-2 is used for data backhaul of enterprise network highway/railway cameras and APs. It supports deployment of straight-through, branching, and FastConnect optical cables, and is mainly used as a Hub Box in low-density access, chain deployment, branching, and cable distribution scenarios.

Features & Benefits

- Tool-free design, easily be opened and closed by the lever handle.
- Plug and play, FastConnect drop cable instead of splicing, and can be installed without opening the closure.
- FastPlug realizes cable fastening and sealing outside the closure, enabling fast installation.
- Supports dispatching fibers from same loose tube into different trays.
- Supports pole, wall, and aerial cable mounting.
- Supports overground, underground, manhole, and hand hole installation.
- Small size and elegant appearance.
- IP68 protection.
